To: Prof. Newton C.A. da Costa
From: J. Perzowski

Dear Newton,

I am glad to inform you that finally I've joined the Brazilian logico-philosophical team. These are really first days of my stay in Brazil. I reached João Pessoa on Friday, March 1. Now, I am trying to acclimatize, hoping to start work in the very near future.

I have plan to work here chiefly on my ontological treatise "Badania ontologiczne" ("Ontological investigations") as well as to summarize my work concerning topography of modal logic. I hope that this project will interest Prof. Dias.

I am enclosing two recent issues of RML (nos. 23 & 24) as well as an offprint of my

paper outlining part of my outblog.

Please also find enclosed for announcements of the forthcoming Bolzano School with kind request to popularize it.

I do hope to use this opportunity to extend my (till now only theoretical and partial) knowledge of South American logical & philosophical scene.

I would like very much to contact you and your colleagues from São Paulo & Campinas.

I would appreciate any relevant suggestion concerning people and places as well.

Looking forward to hearing from you soon,

Friendly yours

Jerry Reul-
