

Southeast
Missouri State University

April 23

Dear Newton,

Just a quick note to let you know that I emailed the editor of History & Philosophy of Logic & (Peter Simons) & he told me that our review came out in Vol. 10 (1989) pp. 115-120.

He's also going to send both of us photocopies of the piece.

I'm very glad to hear that Silvia is on the road to recovery. It must have been a very distressing experience for all of you but you must be very happy to have a granddaughter.

There's not much news to report here. I just emailed Decio the latest version of our response to the referee's comments on our

Synthese paper. As soon as I have
Decio's approval, I'll send it off. Thanks
for all your help and suggestions.
If Synthese ~~was~~ doesn't accept the
revised version then I think we should
submit it somewhere else, like *Jal.*
J. Phil. Logic.

Actually, the managing editor called me
earlier this week asking if I could give
him your address as they would like you
to referee an article. I gave him your
home address — hope that was ok.

We haven't made much progress
in preparations for our move. We still
have to find a home for our dog &
it's all getting a bit nerve-wracking.
But I'm sure it'll all turn out ok
in the end.

I have to go to class.

Take care,
love to your family

Best wishes,

Steve
